2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages
- ☐ the claims, Nos.
- ☐ the drawings, sheets/fig.

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims 1-40	YES
	Claims	NO
Inventive step (IS)	Claims 1-40	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-40	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)Citations

D1 : US 5768454

D2 : US 5367588

NOVELTY (N) AND INVENTIVE STEP (IS)

D1 and D2 represent the closest prior art, where each teaches forming a first-order Bragg grating in an optical fibre by dividing a coherent beam into a zero-order and two first-order components via a phase mask, and focussing the components on the optic fibre to write the grating structure (eg, column 2 line 25 to column 4 line 65, Figures 1 and 3 of D1; column 3 line 36 to column 4 line 65, Figures 1-2 of D2).

However, no obvious combination of D1 and D2 teaches or suggests (i) modulating/adjusting the relative phase of at least one of the beams, and (ii) forming a grating structure comprising superimposed gratings of different order, as per independent claims 1, 13 and 19. Hence these claims, and consequently dependent claims 2-12, 14-18 and 20-40, are novel and inventive over the prior art.

INDUSTRIAL APPLICABILITY (IA)

The subject matter of the claims is applicable to the industrial manufacture of waveguide gratings.
